

Weaving Professional Education into our Practice

INSPIRATION DAYS

Sustainability & Environments

A conservation conversation!
Softening our footsteps and fostering enduring relationships with the environment.

“We have an obligation to leave this world in at least as good a condition as we inherited it.” What does this statement mean for teaching practice? How do we help children develop a sense of responsibility towards their environment? Aspects of sustainable practices will be shared and Alison will discuss how sustainability is about relationships; relationships with people, places and things.

Alison Brierley

Kathryn Delany

Waking up the third teacher

Dispositions to learn develop when children are immersed in an environment that is characterised by activity, contributing and collaborating, communicating and representing, and exploring and guided participation.” (Te Whāriki, p45)

This session will explore effective ideas which can provoke children to stay for longer periods of time to discover, explore and make full use of the potential of our wonderful early childhood environments.
