Heather (Grandimere)

An enthusiastic Learner

Valentina-Joy :

Since you can't come to Kindergarten* for a while, you've been able to take a little bit of Kindergarten home with you.

Today it's the Tinkering Bag – what fun you have had discovering what is in each little bag and making patterns with 1 type or another or combining different things. Its great to see your imagination coming out and you love to show us your creations.

The peg people looked like 10 pins so it was fun to roll a marble at them to knock them over.

Look! You are lining up the peg people and counting them- 1 2 3 4 5 6 7 8, pointing at each one as you go. Now you know how many there are – Good work!

I love to watch you exploring & linking new things to your experience.

Nadine said, "Exploring with the loose parts is so much fun, isn't it Valentina-Joy! What a fabulous story from your Grandimere about your explorations at home during this period of Rāhui."
